

Turning on the Spot tracker

1. Press the power button on the side until the LEDs start blinking

2. Press the start tracking button (the one with the footprint) until the LED above the button starts blinking. From this moment the GPS led will blink in green if the device is able to get fix or in red if it not able to get fix (No clear view to the sky conditions)

3. Once the device is on and in tracking mode you can place it on the boat like it is described in the guide Offshore Tracker_instructions ENG.pdf
